

Road Metals - Rolleston Quarry

528kWp Grid-tied Solar Array

Road Metals engaged us to tailor a solar system to the site's unique requirements. On a section of rehabilitated land formerly used for quarrying, this initiative breathed new life into an otherwise dormant area of the quarry, maximising land use while minimising environmental impact.

Project Highlights:

800MW+ Annual Solar Yield

50% of all site energy from solar

Future-proofed for easy expansion

"The team at Platinum were fantastic from the outset - they tailored a solution specific to our requirements and future expansion plans, and executed the project to a high standard. We are very pleased with the results over the first year of operation"

- JARED JOHNSTON, GENERAL MANAGER
