

Jackson Holmes Contracting

33kWp Solar Array

As a part of the construction of their new facilities, Jackson Holmes wanted to future-proof by adding solar to their new building to offset both carbon emissions and the energy costs of their operations. By financing the system on a lease arrangement, they were able to conserve capital while still gaining full benefit from their solar asset.

Project Highlights:

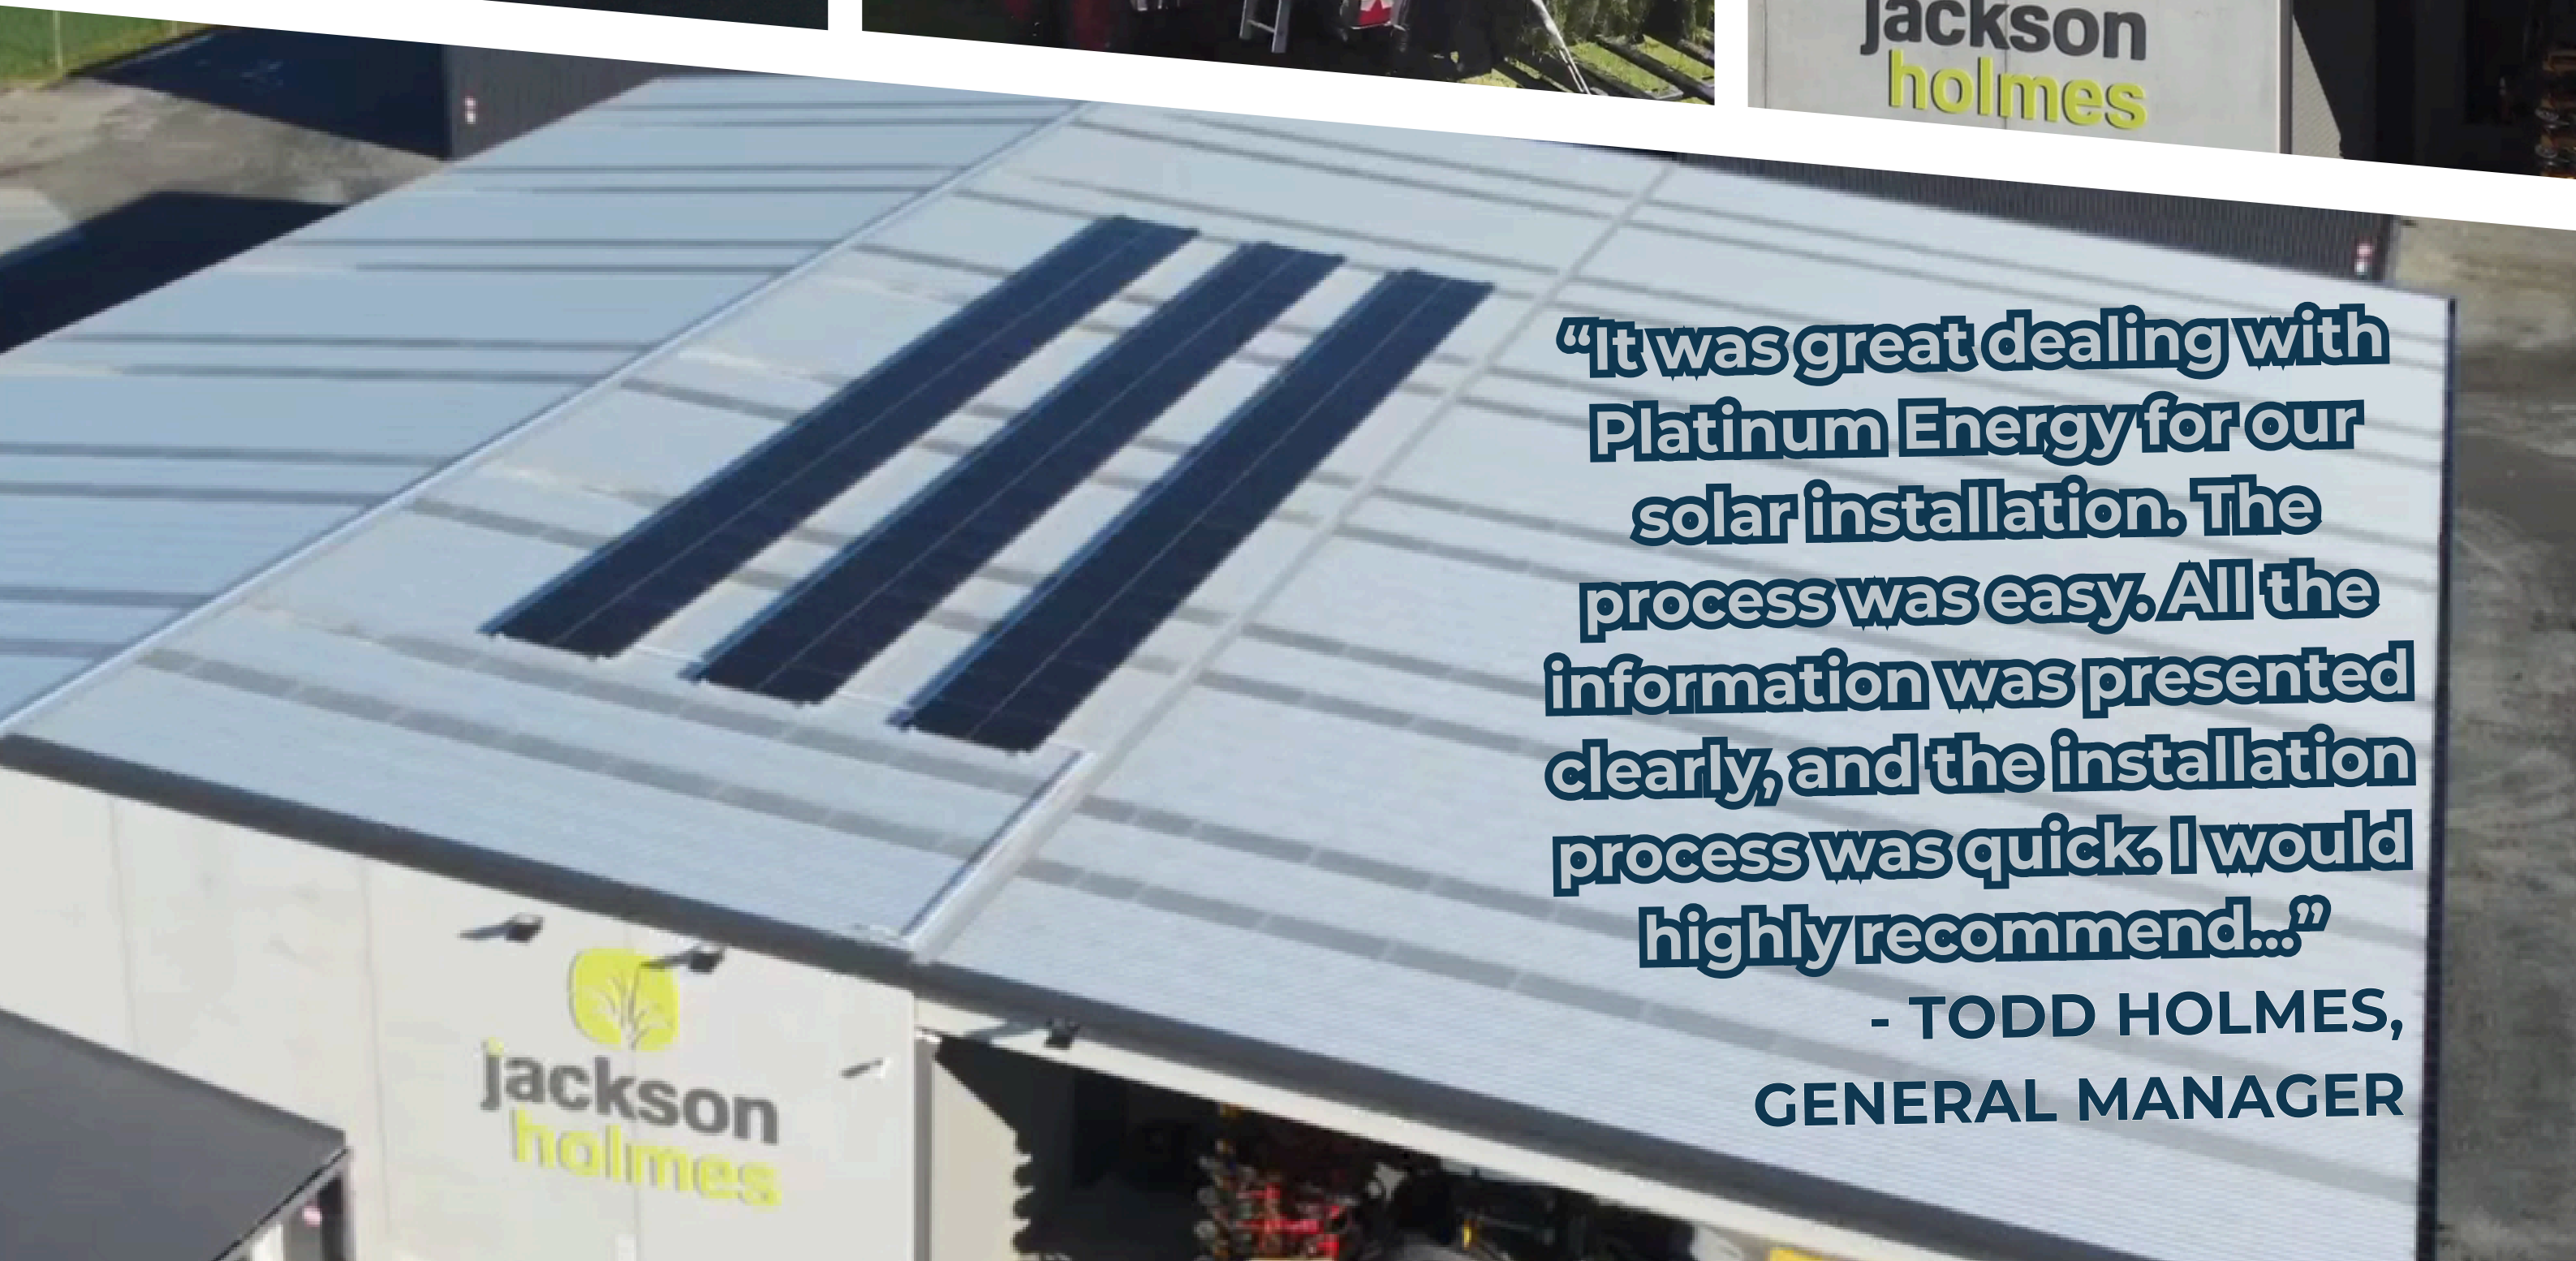

47MWh Annual Solar Yield

6 Year payback, with finance

Cashflow positive from day 1

"It was great dealing with Platinum Energy for our solar installation. The process was easy. All the information was presented clearly, and the installation process was quick. I would highly recommend..."
